

90-Second Commercial"

I am a _____ with ____ years experience in _____.

I am a systems engineer with 15 years experience in Telecom.

Most recently, I have been working at _____ as a _____ where I was responsible for:

Most recently, I have been working at XXX Telecom as a Senior Technical Systems Manager, where I was responsible for leading a team of four engineers in the design, development and implementation of leading edge network switches. I also managed the departmental budget, maintained system uptime to meet corporate standards and interfaced with senior management, keeping them apprised of project status.

While I was there I (1-2 accomplishments):

While there, I met or exceeded goals on three projects, bringing them in before project deadlines and under budget by an average of 5%. I also implemented best business practices, enabling us to cut our staffing by 11% and increasing customer satisfaction ratings by 16%.

My career history includes (organizations, positions held; brief outline*):

My career history includes four years at TomTom.com as a Senior Systems Engineer and three years at Willwall International as a Systems Engineer.

Some of my strengths are:

Some of my strengths are strong organizational skills, excellent team building skills and an ability to develop creative solutions under pressure.

An example of how I use my strengths is

I used my strengths on the BYOB project, where we were two weeks behind schedule and in danger of missing contract deadlines for a \$1.5 million project. I was asked to assume the team leader position and get the project back on schedule. I immediately developed a project spreadsheet outlining the status of all components on the project, identified project slippage, gathered the team and brought them up to date, instilled pride in meeting the deadline, assigned new work priorities, and ultimately met the project deadline.

My goals for the future include / I am currently exploring

I am currently exploring opportunities in the telecom industry, where I can take a lead role in designing, developing, and implementing creative solutions to product problems.
